

Evidence you can verify. Decisions you can defend.

Attescend turns AI test and evaluation results into evidence an authorizing official can verify alone, offline, without trusting the vendor or the test team.

THE PROBLEM

AI fielding decisions rest on test reports nobody downstream can check: which model was tested, whether numbers changed, whether the test ran as described. DoD guidance asks programs to include model test and evaluation results in the authorization package, but gives no way to verify them.

DoD CIO, AI Cybersecurity Risk Management Tailoring Guide, v2, July 2025, §3.1.3.

CORE CAPABILITIES

- Signed receipt for every evaluation step: model, inputs, test and result, chained together
- Independent RFC 3161 timestamps and a transparency log: no silent edits, no back-dating
- Independent evaluator re-execution and co-signature
- Hardware attestation on NVIDIA confidential-computing GPUs
- Offline verifier that recomputes the assurance level (AL0 to AL3) and names any altered or substituted record
- Evidence report mapped to the NIST SP 800-53 and AI RMF controls the evidence supports

PROVEN TO DATE

- Two-party, hardware-attested evaluation on an NVIDIA H100 confidential-computing GPU with production timestamp authorities (21 October 2026). Strict mode: AL3 against a refreshed vendor key set, AL2 against the key set as issued. Separate issuers and keys, one host.
- Offline install, issue and verify with no network
- Container images for Intel and ARM servers
- One changed metric or one swapped receipt fails verification and names the record
- Three U.S. provisional patent applications filed

DEPLOYMENT

- Unclassified networks or a hosted confidential-computing environment
- Inside the customer's own accredited environment
- Disconnected enclaves, with an on-premises timestamp authority

DIFFERENTIATORS

	Records the result	Tamper-evident	Proves model & hardware	Verifiable offline by the buyer
Signed PDF reports, model cards, dashboards	✓	—	—	—
Code signing, infrastructure attestation	—	✓	partial	✓
Attescend	✓	✓	✓	✓

HOW TO BUY

- Scoped pilot: one model, one evaluation workflow
- Then a license for the evidence service and verifier
- Direct, through primes on AI T&E vehicles, or via the Tradewinds Solutions Marketplace (submission under review)

COMPANY DATA

- **Antagon, Inc.**, U.S.-owned small business, Riverview, FL
- UEI KBSGT7CZ4AH3 · CAGE 17E75
- NAICS: 541715 (primary) · 541511 · 541512
